

For my Linear Equation Project I decided to create a fleur de lis. Here are the steps enjoy.

$$x=-2 \quad -2,10$$

$$y=2x+13 \quad 2,13$$

$$y=-1x+4 \quad -2,6$$

$$y=-2x-13 \quad 2,13$$

$$x=2 \quad 2,10$$

$$y=1x+4 \quad 2,6$$

$$y=-1x+7 \quad -2,11$$

$$y=11 \quad 5,11$$

$$y=1x+15-6,11$$

$$x=-6 \quad -6,10$$

$$y=-1x+3 \quad -5,8$$

$$y=2x+13 \quad 2,14$$

$$y=9 \quad 4,9$$

$$y=1x+6 \quad 2,9$$

$$y=1x+7 \quad 2,11$$

$$y=11 \quad 5,11$$

$$y=-1x+15 \quad 6,11$$

$$y=1x+3,5,8$$

$$x=-3,3,4$$

$$y=9,4,9$$

$$y=-1x+6,1,4$$

$$y=1x+7,5,11$$

$$y=4,2,4$$

$$y=1x+3,6,9$$

$$y=9,4,9$$

$$y=-1x-4,2$$

$$y=1x+4,-1,4$$

$$y=2,-3,2$$

$$x=-3,3,3$$

$$y=-1x-2,-4,2$$

$$x=-1,-1,2$$

$$y=1x+2,5,2,2,5$$

$$y=1x-4,2$$
